

# Ocean's Alive, Living Marine Phytoplankton

This unique super-nutrient from the ocean provides the body with an increase in residual energy that builds up significantly when it is ingested on a daily basis. With its abundance of naturally produced vitamins, minerals and original life force (**absorbed directly from the Sun**), everyone that partakes will enjoy a 'whole body' inner strength that they have never experienced before.

**1OZ Bottle      \$60.00**

A team of European doctors, microbiologists and botanists spent many years and millions of dollars researching 40,000 species of marine phytoplankton in the ocean to determine the best species in each category to use for bio-fuel, aqua culture, exotic fish food and ultimately human consumption. Only four species of Marine Phytoplankton were found to be beneficial for human consumption and based on nutritional profiles, **one species** was super beneficial and was the single species chosen for production.

As a result of this extensive research, technologically advanced commercial facilities have now been developed and constructed to produce marine phytoplankton in large volume using sophisticated bio-reactors. The bio-reactors consist of extensive glass tubing interconnected in a horizontal grid the size of a football field. A '**Spring Bloom**' environment is created that allows natural photosynthesis to occur using sunlight to grow the marine phytoplankton bio-mass. The purified sea water solution in which the marine phytoplankton grows ensures that there are no other species contaminating the bio-mass. This method produces a pure '**Beyond Organic**' super concentrated nutrient.

Once the bio-mass reaches maturity, it is then harvested into a powerful centrifuge that

spins the water out from around the cells but leaves the water within the cells protecting the valuable life energy. The centrifuged bio-mass has the consistency of thick peanut butter.

To create the '**Ocean's Alive**' liquid nutrient combination, the live marine phytoplankton bio-mass is transferred from the centrifuge and immediately blended into an 'ocean derived' concentrated ionic trace mineral solution. This concentrated solution is highly beneficial to human health as it contains more than **90 ionic and trace minerals** and is produced using a natural evaporation process employing the sun and the wind which eliminates 93% of the sodium.

This purified ocean water concentrate has the power to preserve the marine phytoplankton in suspended animation, protecting the original life energy, allowing it to be bottled and stored at room temperature with no deterioration. The live blend is finally potentized energetically with its own frequency to maximize the nutritional life force!

People that experience **Ocean's Alive** are known to enjoy enhanced brain function, improved immune function, antiviral/antifungal/antibacterial effects, improved cellular repair, radiation protection, cancer protection, detoxification support, anti-inflammatory support, antioxidant support, improved circulation, improved heart function, allergy/asthma relief and a residual 'grounding energy' overall. There are hundreds of references in text books detailing the vast array of human health benefits gained through the consumption of marine phytoplankton.

The intense chlorophyll content in Ocean's Alive also increases oxygen uptake and higher oxygen uptake means more fuel to muscles, which translates to improved performance and endurance. With the **smallest nano-particulate** size of all micro algae's, **Ocean's Alive** delivers vital life energy at the DNA/Mitochondria level and also penetrates the blood/brain barrier feeding the higher master glands located deep in the brain stimulating significant mental clarity.

**Ocean's Alive** is an original, live, whole, concentrated raw food requiring no refrigeration and comes packaged in 1 oz. cobalt blue glass bottles with droppers for easy dispensing.

**Ocean's Alive Liquid Marine Phytoplankton** provides powerful nutrition allowing people to invest in their health and get a bountiful return on their investment.

Some of the benefits people have reported from using Marine Phytoplankton are:

- A gentle yet powerful energy that builds residually day by day
- Whole body homeostasis
- Assist to regulate blood sugar naturally
- Eyesight improvement and increased strength
- Skin appears more vibrant and younger
- Calming of the mind and body with enhanced meditation

- Speeds the recovery from illness and disease
- Relieves symptoms of heartburn
- Memory improvement
- Instant trace mineral gratification with 92 macro and trace minerals
- Assists to strengthen the immune, nervous, and endocrine system
- Antiviral, antifungal, and antibacterial
- Helps defend against radiation
- Powerful anti-inflammatory & antioxidant qualities
- Improves circulation & heart function
- Allergy & asthma relief
- Essential fatty acids - Omega 3, 6, 7, 9

**One Month Supply:**

1 oz. contains 10.5g (10,500mg) of Pure Whole Live Marine Phytoplankton Providing 350 mg per day/serving x 30 Day Supply

Compared to competitive products that are much less concentrated, our price is at least 7 times more value than any other liquid Marine Phytoplankton product on the market. Value comparison for quality is off the charts!

Ocean's Alive delivers **350mg per day** of Super-Charged Pure Live Marine Phytoplankton with Zero Fillers!

**'REAL TIME RESULTS'** are always confirming to us that this is a wonderful superfood that resonates with everyone!
